SUMMARY

Full StackSoftware engineer with nearly 2 years of professional experience in in designing, developing, and deploying scalable microservices and web applications. Proficient in Java, Spring Boot, and AWS cloud services, with a proven track record of optimizing performance, leading CI/CD initiatives, and delivering high-impact solutions

TECHNICAL SKILLS

Languages: Java (8, 11, 17, 21), Kotlin, Python, SQL, JavaScript, TypeScript
Backend: Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, REST APIs, GraphQL, Microservices, Kafka, Netty
Frontend: React, Redux, HTML5, CSS3, Three.js
Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, DynamoDB
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudWatch, Bedrock), Docker, Kubernetes, Jenkins, GitHub Actions
Testing & Tools: JUnit 5, Mockito, REST Assured, k6, Postman, Maven, Git, Prometheus, Grafana, Jira

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | NextGen IT Solutions (Client: JPMorgan Chase), Ashburn, VA — Feb 2026 - Oct 2026

- Cut average API response time from 450ms to 120ms by adding Redis caching and optimizing complex SQL queries.
- Built Java 17 and Spring Boot microservices for a data management platform, improving processing efficiency by 30%.
- Built Jenkins and GitHub Actions CI/CD pipelines for AWS (EC2, S3, RDS), cutting manual deployment time by 80%.
- Set up Prometheus and Grafana monitoring for 15+ microservices, catching issues early and cutting downtime by 15%.
- Collaborated with product managers and engineers in Agile sprints to turn requirements into on-schedule features.

Associate Software Engineer | Appworks, McAllen, TX — Feb 2025 - Jan 2026

- Built modular Java and Python back-end services for core business apps, including third-party REST API integrations.
- Led code reviews and unit testing against secure-coding standards, reducing post-release defect density by 15%.
- Helped migrate on-premise applications to AWS (EC2, S3), containerizing services and drafting initial IaC templates.

Software Engineer Intern | DXC Technology, Hyderabad, India — May 2022 - Oct 2022

- Built features for a customer-facing web portal in Java, Spring MVC, and JavaScript, and optimized its MySQL queries.
- Partnered with QA to resolve 50+ defects, improving the portal's stability and user experience.

PROJECTS

ShadowDB | Database Shadowing Proxy — *Java, Netty, Kafka, PostgreSQL, MongoDB, Prometheus, Grafana*

- Built a Netty proxy that mirrors live database traffic to a shadow database for safe schema-migration and chaos testing.
- Benchmarked at 50K+ requests/sec with 3ms average added latency using Netty's asynchronous, non-blocking I/O.
- Added Grafana dashboards comparing primary vs. shadow query performance, surfacing 12+ regressions.

API Gateway & Contract Testing Framework — *Java, Spring Boot, JUnit 5, REST Assured, Mockito, Maven, Jenkins*

- Built a Spring Boot gateway over 5 mock financial services with 150+ edge-case contract tests at 92% line coverage.
- Cut test boilerplate by 45% with a reusable test-data factory; Mockito isolation exposed 3 race-condition bugs.

StayFinder | Vacation-Rental Booking — *Java 21, Spring Boot, Kafka, PostgreSQL, Elasticsearch, Redis, Docker*

- Split search, booking, and payments into services; a Kafka-based saga releases held dates when a payment fails.
- Built Elasticsearch geo, date, and price search over 1M seeded listings; p99 held under 150ms at 1,500 req/s in k6.

Trip Planner GraphQL API — *Kotlin, Spring Boot, Spring for GraphQL, Spring AI, MySQL, Redis*

- Designed a GraphQL schema for trips and wishlists; DataLoader batching cut database calls per query from 40+ to 3.
- Added AI itinerary suggestions via Spring AI and an LLM API; Redis response caching kept API cost under $5/month.

FinSight | AI Financial Compliance Agent — *Java, Spring Boot, Python, FastAPI, AWS Bedrock, Docker*

- Built an AWS Bedrock agent that flags BSA structuring, screens OFAC/AML watchlists, and generates audit-ready reports.

The Gallery | Agentic F1 Broadcast Director — *Python, FastAPI, WebSockets, Gemini 2.5, Three.js*

- Paired a 10 Hz telemetry scorer with Gemini 2.5 Flash to direct a live F1 feed, catching 50% of passes vs. a 1.8% baseline.

EDUCATION

Rowan University | Bachelor of Science in Computer Science — Dec 2024

- Merit-based International Credit Transfer Scholarship. Coursework: DS&A, Distributed Systems, Operating Systems, AI/ML.
- ACM Tech Coordinator: organized 6 hackathons and 12 tech talks for ~300 students; secured $15K in sponsorships.

CERTIFICATIONS & AWARDS

Certifications: AWS Certified Developer – Associate; Machine Learning Specialization (Stanford Online & DeepLearning.AI)
Awards: 4th of 68 teams, iNeuron.ai Tech-A-Thon; 7th of 40 teams, Great India Hackathon
